Summary

Frontend Developer and Information Technology student who has worked on building web applications using HTML5, CSS3, JavaScript, React and Firebase. Has experience in turning requirements and designs into working user interfaces adding features setting up authentication and real-time data and fixing problems on the frontend. Pays a lot of attention to design, code that can be used again ease of use and always learning new things. Has experience using frontend development concepts from start, to finish including developing, testing and improving projects.

Education

Bachelor's Degree in Information Technology,

2024 – 2028

Borg Al Arab Technological University

- University Major: Software Engineering

Skills

Technical Skills

- **Frontend Development:** HTML5, CSS3, JavaScript, React, Responsive Web Design, UI Development
- **Styling & Layout:** CSS3, Tailwind CSS, Bootstrap, Flexbox, CSS Grid, Responsive Design
- **Backend / Integration:** Firebase Authentication, Firebase Realtime Database
- **Development Practices:** Testing, Debugging, Problem Solving, Reusable Components, API/Data Integration, Responsive Development
- **Methodologies:** Familiarity with Agile/Scrum development concepts

Projects

TaskMaster, Responsive Frontend Web Application | HTML5, CSS3, Tailwind CSS, JavaScript, Firebase

- Led development of a student productivity web application for managing **tasks, courses, progress, and schedules**.
- Built responsive UI and interactive features using **HTML5, Tailwind CSS, and JavaScript**.
- Integrated **Firebase Authentication** with Email/Password and Google login.
- Implemented **Cloud Firestore** integration for user profiles, courses, and tasks, including real-time updates.
- Developed authentication and application logic and debugged Firebase authentication-state issues.

National Health Database System, Multi-Role Web Application | PHP OOP, MySQL, MVC, HTML5, CSS3

- Developed a secure medical records platform using **PHP OOP, MySQL, and MVC architecture** with Admin, Doctor, and Patient roles.
- Implemented **authentication, PHP sessions, password hashing, and role-based access control**.
- Structured the application using separate **Models, Views, and Controllers**, with middleware for access-control enforcement.

- Built patient records, prescriptions, profiles, user management, patient search, and role-aware dashboard features.
- Enforced secure data access so patients could view **only their own medical records** and doctors only their assigned patients.

Certifications & Training

Software Development — React Frontend Web Developer,

07/2026 – Present

Digital Egypt Pioneers Initiative (DEPI)

- Currently completing a **21-week React Frontend Web Developer** training program covering modern frontend development and software engineering practices.
- Developing practical skills in **HTML5, CSS, JavaScript, TypeScript, React, Bootstrap, Git, and GitHub**.
- Training includes **React development, code style and best practices, UI/UX principles, functional documentation, and unit testing**.
- Additional training covers **Node.js, Express, Docker, and backend fundamentals**, providing exposure to full web application development.
- Working toward a **capstone project combining React and Node.js** to develop a real-world web application.

Web Development Course - 30 Hours, Egypt Makes Electronics Innovation Hub

10/2023

(EME-IH) Borg | ITIDA Educational Initiative, managed by IdeaSpace

- Completed a **30-hour introductory web development course** covering fundamental web development principles.
- Built foundational knowledge of **HTML, CSS, web page structure, and frontend development concepts**.

Extracurricular Activities

Web Development Mentor, University IT Club

04/2026 – 05/2026

- Taught students **HTML5 and CSS3 fundamentals**, including page structure, styling, layouts, and responsive design principles.
- Introduced **basic SEO principles** and proper HTML structure.
- Guided students through practical frontend implementation and troubleshooting.
- Evaluated student web development projects and provided constructive technical feedback.

Organizing Committee Member & Web Development Judge - Robo Ramadan

11/04/2025

2025, IT Club, Jupiter Academy & EME Borg | 2025

- Supported the organization and delivery of **Robo Ramadan 2025** activities in collaboration with IT Club, Jupiter Academy, and EME Borg.
- Evaluated participating students' web development project implementations based on technical and frontend requirements.
- Assessed project quality and communicated constructive technical feedback to participating students.

Awards

First Place - Bader for Developing Youth Financial Capabilities,
Care Egypt & HSBC

03/2024

- Won **1st place** in the competition for **ServoLink**, a platform concept designed to connect students, researchers, startups, and entrepreneurs with relevant service providers and technical mentors.
- Developed and presented the **ServoLink business concept**, including the problem definition, customer journey, solution, business model, market analysis, and prototype.
- Contributed to the development of a **React-based platform prototype** focused on connecting users with service providers and streamlining project requirements.
